# Accessing the Internet at Home
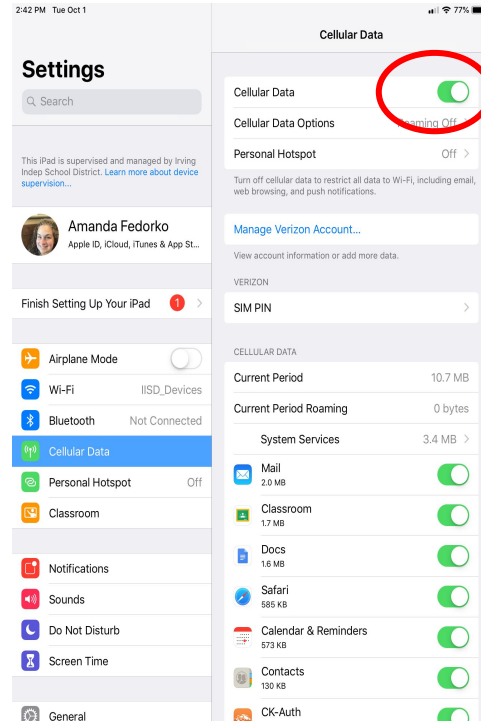

First, connect to your home Wi-Fi network OR turn on cellular data

Using your home - or other - Wi-Fi

1. Open your "Settings" app
2. Select "Wi-Fi"
3. Be sure that the "Wi-Fi" option is enabled (the switch at the top is green)
4. Select the name of your home network, or the network you are using
5. Enter the password for the network

Using cellular data

1. Open your "Settings" app
2. Select "Cellular Data"
3. Be sure that the "Cellular Data" option is enabled (the switch at the top is green)
Second, click the "IISD Login" app on your iPad

Login with your Irving Single Sign On (SSO) credentials as you would normally do.

Username: (first 3 letters of your first name + last name)

May have a number at the end
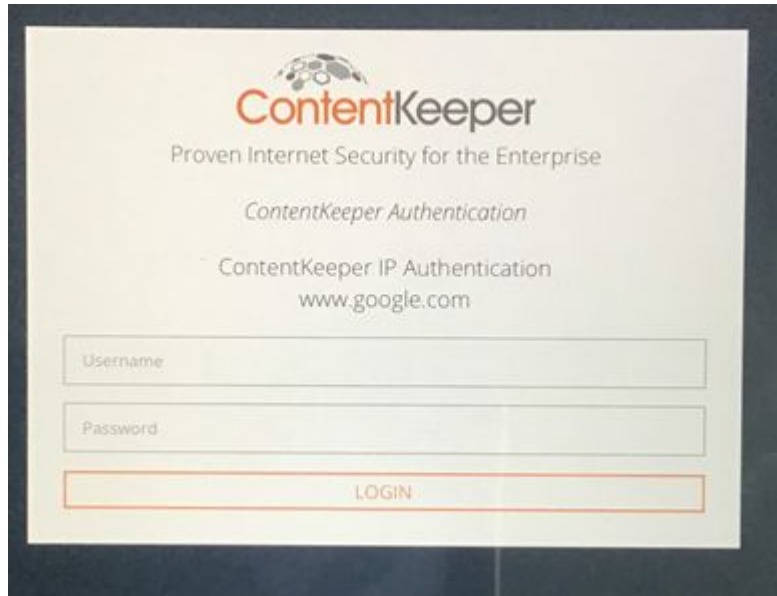

Password: ID number-p

Third, select your browser

Safari

Google Chrome

If the web browser should show you the screen below, enter your student username and password (your normal login)

Use the internet! You can now login to apps, websites, etc. Your login should be good for a few hours.

Troubleshooting:

Are you having trouble accessing the browsers? Sometimes it may help to clear your browser in the "Settings" app.

Follow the steps in the picture for both of your browsers.
